

Logitech G FITS(985-001182)

Logitech G FITS - True wireless earphones with mic - in-ear - Bluetooth / LIGHTSPEED - black

Logitech G PRO racing wheel delivers a professional-grade connection to the race with Direct Drive and TRUEFORCE feedback technology. Featuring an extensively tested PRO "thumbsweep" button layout, plus magnetic gear-shift paddles, dual clutch paddles, and easy mounting. Logitech G FITS mold to give you a personal fit. No matter what size your ears are. Whether you like to be immersed in PC, mobile or console games. And no matter what hair styles or hats you like to wear, FITS create an individualized experience that adapts to you and how you like to play.

Key Selling Points

- True wireless gaming earbuds
- Lightspeed wireless
- Game-mode Bluetooth
- Lightform molding
- Premium sound
- Beamforming mics
- Passive noise cancellation

Product Features

True wireless gaming earbuds

FITS are built for gaming. They have a long battery life and are equipped to play across PC, Mac, console and mobile. They offer high-fidelity sound in a small package and the custom molded tips create passive noise cancellation.

Lightspeed wireless

FITS are the first earbuds to feature Lightspeed. This gives you a pro-grade connection, high-performance audio response, strong connectivity and a long battery life.

Game-mode Bluetooth

Enjoy more freedom of play. Switch between devices thanks to connectivity through Lightspeed and Bluetooth. Not only can you pair FITS with your favorite devices, you can play in two modes. Game-mode Bluetooth to reduce latency when gaming. And standard Bluetooth to increase battery life and range when listening to music or watching videos.

Lightform molding

When you first get Logitech G FITS, you'll experience patented Lightform technology. In just 60 seconds, the earbud tips will magically mold to create a perfect fit for your ears.

Premium sound

Logitech G FITS aren't your average earbuds. Thanks to the sound experts at Ultimate Ears, they deliver full, warm, detailed sound with deep punchy bass. With the FITS app, you can access EQs that are optimized for FPS or RPG games, music, podcasts, UE Signature Sound, Bass Boosts and more. Or you can finely turn your own EQ settings.

Beamforming mics

Each earbud contains two built-in beamforming microphones. If you're playing with friends or streaming, everything you say will be heard loud and clear.

Passive noise cancellation

The custom fit produced by Lightform technology creates a seal that blocks out noise so well it produces a passive sound isolation effect. So all your games and music will sound amazing.

Main Specifications
